Account Setup

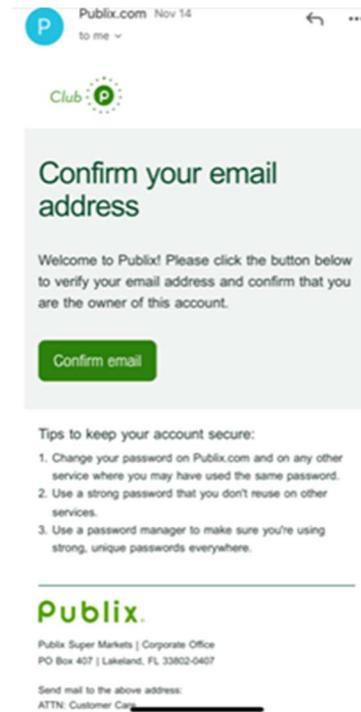

Almost finished.

We just need to confirm your email address. Click the link in the email we sent mypharmacyaccount@emaildomain.com

RESEND

Log In

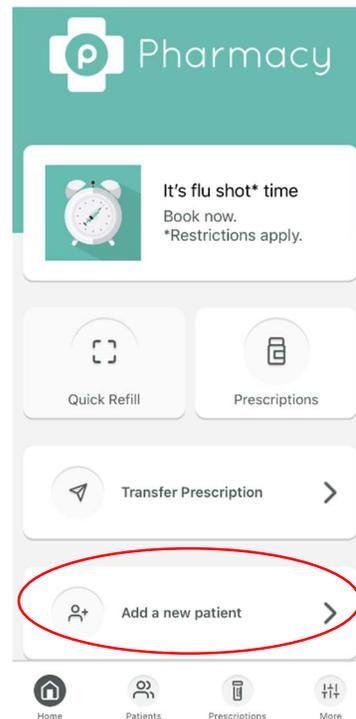

5. Navigate to your email inbox and open the email sent from Publix.com. Please check your junk/spam folder if you do not see the email. Click the **Confirm email** button provided in the email to verify your email address for the account.
6. Once your email address has been verified, you have successfully completed the account creation. You may now log into the Publix Pharmacy app with the credentials you provided.

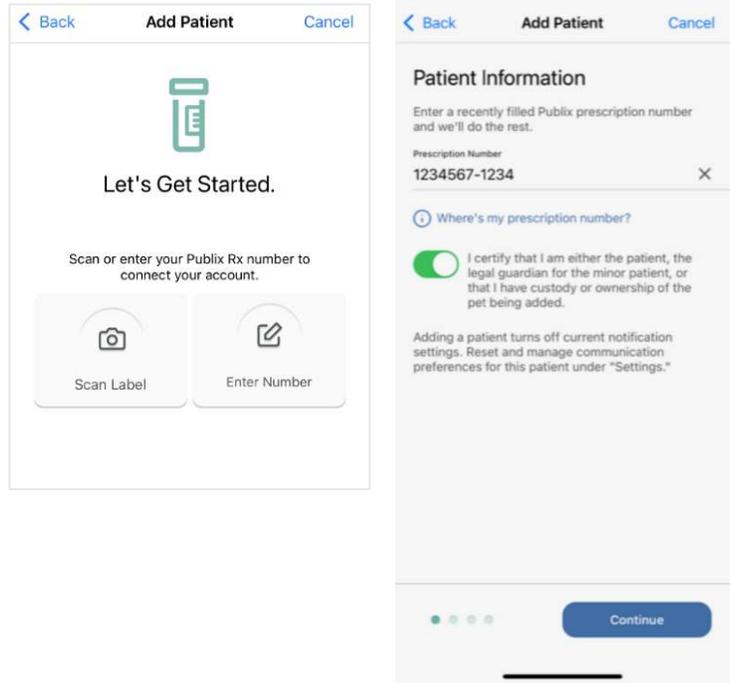

Add a patient.

Complete the following steps to add yourself, your dependent(s) or minors (age 13 and younger), and your pets to your account.

1. Tap **Add a new patient** from the home screen of the Publix Pharmacy app.

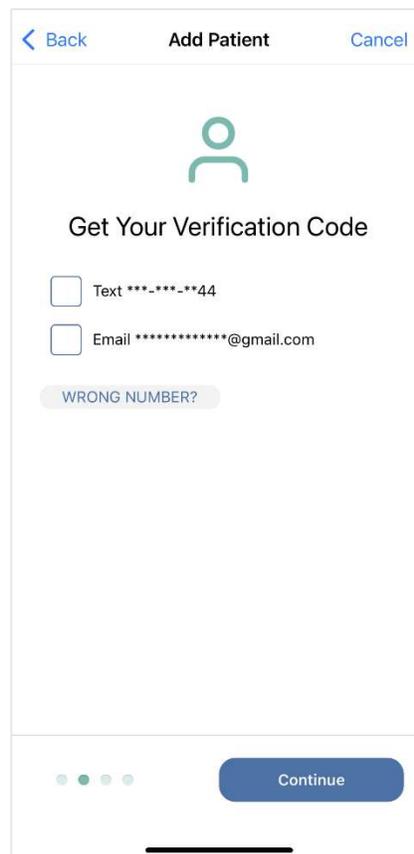

2. Select **Scan Label** to scan your prescription label or select **Enter Number** to enter your entire prescription number, including the 4-digit store number following the dash. Tap the certification slider and tap the **CONTINUE** button.

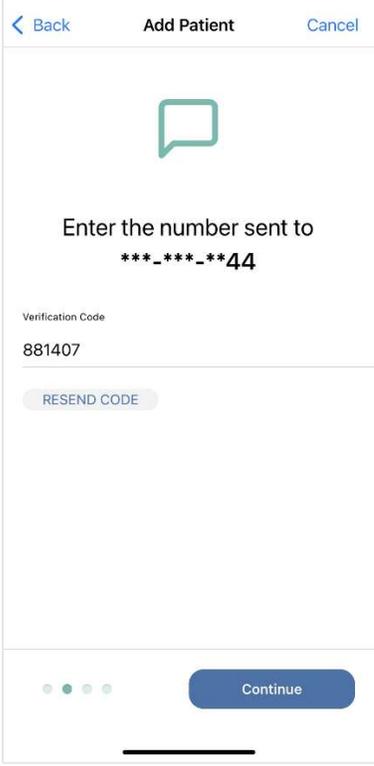

3. To confirm your identity, check the box next to your phone number or email address where you would like to receive the verification code. Then, click the **CONTINUE** button.

If you receive an alert upon entering your prescription number, or if your contact information is incorrect, please contact your pharmacy to update your contact information.

4. Enter the verification code delivered by email or text and tap the **CONTINUE** button.

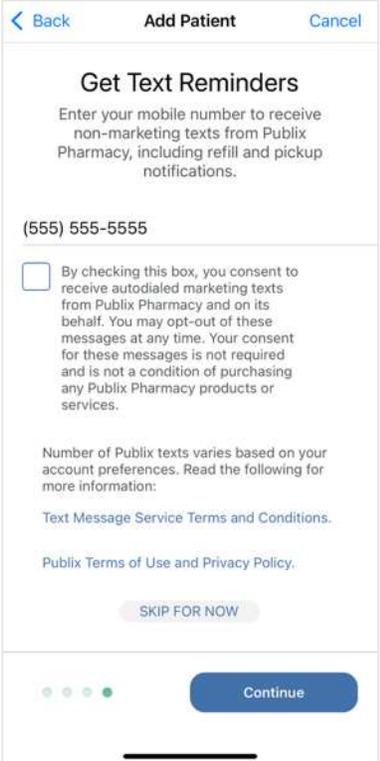

Once your identity has been verified, your patient has successfully been added to your account. The patient added should now be visible under **Patients**.

The screenshot shows a mobile app interface for adding a patient. At the top, there are navigation options: a back arrow, the title "Add Patient", and a "Cancel" button. Below the navigation is a green speech bubble icon. The main text reads "Enter the number sent to ***_***_**44". Underneath, there is a label "Verification Code" and the entered code "881407". A "RESEND CODE" button is located below the code field. At the bottom, there are four dots indicating progress, with the third dot filled, and a blue "Continue" button.

5. After successfully adding a patient, you will be redirected to a screen to add your mobile phone number to your account. This step is optional, but necessary to enable prescription notification text messages.

- Enter your mobile phone number and click **Continue**. Enter the verification code delivered via text, if prompted, and click **Continue**.
- If you do not wish to add your mobile phone number, click **SKIP FOR NOW**.

The screenshot shows a mobile app interface for adding a patient, specifically the "Get Text Reminders" step. At the top, there are navigation options: a back arrow, the title "Add Patient", and a "Cancel" button. The main heading is "Get Text Reminders". Below it, the text reads "Enter your mobile number to receive non-marketing texts from Publix Pharmacy, including refill and pickup notifications." The phone number "(555) 555-5555" is entered. There is a checkbox with a "By checking this box, you consent to receive autodialed marketing texts from Publix Pharmacy and on its behalf. You may opt-out of these messages at any time. Your consent for these messages is not required and is not a condition of purchasing any Publix Pharmacy products or services." Below this, there is a note: "Number of Publix texts varies based on your account preferences. Read the following for more information:" followed by links for "Text Message Service Terms and Conditions" and "Publix Terms of Use and Privacy Policy". At the bottom, there is a "SKIP FOR NOW" button and a blue "Continue" button.

Set your communication preferences.

Update your communication preferences to receive notifications when your prescription is ready or when your prescription needs to be refilled.

Select Email, App and/or Text under Prescription Ready and/or Refill Reminder to enable notifications for each contact method. Then, tap **Save**.

Your Publix Pharmacy account registration is now complete.

Add Patient Save
