

Four Grams of Sugar or Less

Whether you're looking to lose or maintain your weight or prevent or manage diseases, it's always good to be sensible about sugar. Sugar has many other forms and names, including molasses, honey, high fructose corn syrup, sucrose, and more, so we've put together a list of foods that will help you reduce or monitor your intake. Every food on this list is what we consider to be sugar sensible, with four grams or less of (natural and added) sugar per serving.
